# Infinity

---

The most versatile architectural sign system

# Infinity Classic

---

Infinity Classic is the perfect solution for complex projects. Its modular and highly adaptable system is based on a perforated back plate to which injection moulded plastic clips may be fixed – a classic Modulex solution. You can therefore put together panels very freely and extend and modify the system later if necessary.

Infinity can also be used without a back plate, but with an intermediate piece and fixing clips that are more cost-efficient (see Infinity Basic). If you want a more distinctive solution you can design your own system or even introduce alternative materials. Infinity offers unequalled flexibility of design and all the advantages of a conventional modular system.

## Did you know?

---

Infinity offers different mounting options from a back plate with a locking system to wall rails and mounting clips, screws or self-adhesive tape.

Infinity is without doubt the most versatile and innovative system on the market.

## A clever & cost-efficient system

---

Infinity Basic makes it possible to carry out projects with interesting graphic content without sacrificing the economic advantages of the industrialized system.

Infinity also allows a creative approach to form – without the cost penalties usually associated with special solutions. So you get the cost benefits of mass production and the reassurance that the system can be supplemented in the future without sacrificing creative freedom.
